<div><div></div>Populated Place</div>	<div><div></div>Reservoir</div>	
<div><div></div>Residential</div>	<div><div></div>River</div>	
<div><div></div>Recreational</div>		

Consequences within the AOI on 02/04/2015			
		Affected	Total in AOI
Flooded area	ha		2108
Estimated population	Inhabitants	130	2602
Settlements	Residential	0	147
	Sports Ground	0	1.5
Transportation	Secondary roads	0	22
	Local roads	68.3	298

#### Map Information

Due to heavy rainfall during last month, extensive damages have been reported in infrastructures and networks along the Strymonas river, in Central Macedonia. Many embankments have been broken, especially in the southern part of the river, flooding the road and rural network, while many hectares of agricultural land have been completely inundated. The affected areas were declared in the state of emergency. The core users of the maps are Disaster Response Authorities involved in the operations.

#### Data Sources

Radarsat-2 © MDA (acquired on 02/04/2015 16:23 UTC, GSD 8 m) Ltd. All rights reserved.  
COSMO-SkyMed © ASI 2015 (acquired on 01/04/2015 16:11 UTC, GSD 5 m) provided by e-GEOS S.p.A., all rights reserved. Provided under ESA GSC-DA DWH License.  
ESRI World Imagery © ESRI DigitalGlobe (acquired on 16/08/2010, GSD 0.6 m, 0% cloud coverage).  
Base vector layers based on OpenStreetMap © OpenStreetMap contributors, GeoNames (approx. 1:10000, extracted on 31/03/2015), refined by ITHACA. Source information is included in vector data.  
Elevation data: SRTM (90m posting). Height in meters above mean sea level.  
Population data: Landscan 2010 © UT BATTELLE, LLC.  
All Data sources are complete and with no gaps.  
Inset maps based on: Administrative boundaries (JRC, 2013, GISC0 2010, © EuroGeographics), Hydrology, Transportation (Natural Earth, 2012, CCM River DB © EU-JRC 2007), Settlements (Geonames, 2013).

#### Dissemination/Publication

Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapefile and KML formats).  
Map products available in the Copernicus EMS Portal at the following URL:  
<http://emergency.copernicus.eu/mapping/list-of-components/EMSR122>  
All products are © of the European Union.

#### Disclaimer

The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with Copernicus EMS Rapid Mapping Product Portfolio specifications.

#### Map Production

The present map shows the flood delineation in the area of Mavrothalassa (GREECE). The basic topographic features are derived from public datasets, refined by means of visual interpretation of the pre-event ESRI World Imagery. The layer 'Land subject to inundation' includes areas such as riverbed, river meadow and marsh.  
Thematic layers, assessing the delineation of the event, have been derived from the post-event Radarsat-2 and COSMO-SkyMed images.  
All satellite images have been radiometrically enhanced and geocoded using SRTM elevation data.  
The estimated geometric accuracy of this product is 5 m CE90 or better, from native positional accuracy of the background satellite image.  
The estimated thematic accuracy of this product is 85% or better, based on previous experience in using high-resolution SAR for flood extent delineation. Please be aware that the thematic accuracy might be lower in urban and forested areas due to known limitations of the analysis technique.  
Only the area enclosed by the Area of Interest has been analyzed.
